Art Unit: 1652

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 38-64 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 19-29 of U.S. Patent No. 5,962,327 and claims 1-7 of U.S. Patent No. 6,238,924. Although the conflicting claims are not identical, they are not patentably distinct from each other because, as shown by the explanation of the specification by applicants in the instant amendment, I-SceI is a Group I intron endonuclease and HO endonucleases work by the same mechanism. The claims in the two patent are drawn to essentially the same method using I-SceI. Up until this teaching of the specification was pointed out to the examiner, he was not aware that I-SceI was a Group I enzyme. The statement on line 3 of page 21 is that "I-endonucleases can be classified..." and it was not clear that this recitation meant Group I. The examiner warned that if I-SceI was shown to be an HO endonuclease or Group I encoded endonuclease, this obviousness-type double patenting rejection would need to be done.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1652

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
